

INTER-OFFICE CORRESPONDENCE

DATE June 9, 1980

TO	H. Shaw N. R. Werthamer	REFERENCE
		SUBJECT
FROM	H. N. Weinberg	GREENHOUSE PROGRAM

At the CRIAC Meeting on June 4 I presented the material on the Greenhouse Program as covered in the attached pages 15 and 16. George Piercy questioned me closely on the statement that there is a net CO₂ flux out of the ocean at the upwelling zones. He argued that the concentration of CO₂ in the ocean in parts per million could well be higher than that in the atmosphere in parts per million and that there would be no net flux because those concentrations might be the ones required for equilibrium. On reflection, I think George may be right. Please let me have your comments.

H. N. WEINBERG
